

# About The SecAI+ Exam

Chapter 00 · Episode 01 · Orientation — Your Roadmap to CY0-001

---

# What Is CompTIA SecAI+?

Vendor-neutral AI security certification

Applies across clouds, platforms, and toolsets

The first of its kind from CompTIA

# The Dual Focus

## DEFEND AI

Protect models from adversarial attacks

Secure training data pipelines

Control access around AI APIs

## USE AI

AI-powered threat detection

Automated incident response

AI tools in the SOC

# Recognized Globally

Maps to DoD 8570 and 8140 requirements  
Valued in government and  
defense contracting

## RECOGNIZED GLOBALLY

**SECAI+ · CY0-001**

**DOD 8570**

**DOD 8140**

### **GOVERNMENT & DEFENSE CONTRACTING**

**8570 · 8140 WORKFORCE DIRECTIVES**

One credential, recognized where DoD workforce  
requirements apply.

# Why SecAI+ Matters Now

**85%**

Enterprises already hit by an AI security incident

**2×**

AI/ML security — fastest-growing specialty in security job postings

**2027**

AI security projected as a board-level mandate

# Four Exam Domains

**DOMAIN 1**  
AI concepts for cybersecurity

**DOMAIN 3**  
AI-assisted security

**DOMAIN 2**  
Securing AI systems

**DOMAIN 4**  
Governance, risk, & compliance

# Use This Course Well

1. Watch in order — earlier concepts support later ones
2. Review the exam objectives before and after each episode
3. Practice hands-on — PBQs test applied skill
4. Take practice exams before you book the test

# SecAI+ Exam Info

Chapter 00 · Episode 02 · Orientation — Logistics, Domains & Question Types

---

# The Exam at a Glance

**60 QUESTIONS**  
Multiple-choice +  
performance-based

**600 TO PASS**  
Scaled scoring, 100–900

**60 MINUTES**  
About one minute  
per question

**3 YEARS**  
Renew via 30 CEUs or retake

# Domains & Weights

## **DOMAIN 1 · 17%**

Basic AI concepts —  
~10–11 questions

## **DOMAIN 2 · 40%**

Securing AI systems —  
the heavyweight

## **DOMAIN 3 · 24%**

AI-assisted security —  
~14–15 questions

## **DOMAIN 4 · 19%**

GRC —  
about 11 questions

## **BALANCE**

No single domain is the exam — prepare across all four

# Two Question Types

## MULTIPLE CHOICE

Single and multiple response

No partial credit on multi-response

Scenario-based situations

## PERFORMANCE-BASED

Simulated real environments

Analyze tool output and configs

Front-loaded — flag and return

# Built for Practitioners

## ANALYSTS

AI changes your  
threat landscape

## SOC

SIEM, SOAR,  
AI-assisted hunting

## AI/ML ENGINEERS

Security vocabulary +  
adversarial mindset

## GRC

AI regulatory  
frameworks and policy

# Before You Start

No official prerequisite

CompTIA recommends 2+ years hands-on IT security

Security+ or equivalent? You're in good shape

# Exam Day Principles

1. Read carefully — BEST, MOST, LEAST qualifiers
2. Manage your time — bank the 20-second wins
3. Flag and return with fresh eyes
4. Trust your preparation

# What SecAI+ Does for You

Chapter 00 · Episode 03 · Orientation — Career Value & Pathway

---

# Career Benefits

## **VALIDATION**

Proof you can  
secure AI systems

## **SALARY**

15–30% premium  
over traditional roles

## **DIFFERENTIATION**

A formal AI  
credential few hold

## **COMPLIANCE**

Maps to DoD 8570  
and 8140

# Where SecAI+ Takes You

## ARCHITECT

AI Security Architect —  
controls & isolation (senior)

## MLSECOPS

MLSecOps Engineer —  
pipelines, monitoring, testing

## RISK

AI Risk Analyst —  
impact assessments & documentation

# More Roles in Demand

## DATA

Security Data Scientist —  
AI data & analysis tools

## THREATINTEL

Threat Intelligence Analyst —  
adversarial AI techniques

## GOVERNANCE

AI Governance Specialist —  
ethics boards and compliance programs

# The Market Signal

AI/ML security postings up 112% (2022–2025)

2.5× cloud security growth · 4× SOC analyst growth

AI-linked governance and risk roles up 67%

## JOB POSTING GROWTH · 2022–2025

The fastest-growing specialty in security.

# Your Certification Pathway

## **SECURITY+**

The security foundation  
this course builds on

## **AAISM**

ISACA's AI security  
management next step

## **SECAI+**

AI security —  
you are here

## **CISSP / CISM**

Senior leadership  
gold standard

# Demo Setup Instructions

Chapter 00 · Episode 04 · Orientation — Get the Demos Running

---

# Pick Your Python Environment

## GOOGLE COLAB — RECOMMENDED

Free — use your Gmail account

Nothing to download or install

No libraries to manage

## LOCAL PYTHON

Already installed and comfortable?

You manage your own libraries

Fine — your choice

# Google Colab — Step by Step

Sign in with Gmail · File → New Notebook

---

# Upload Your Demo File

Files → Upload · Colab is a sandbox — keep copies saved elsewhere

---

- ..
- sample\_data
- ep01\_deterministic\_vs\_probabilistic...

```
[1] !python3 /content/ep01_deterministic_vs_probabilistic.py
```

PART 1: Deterministic Function (SHA-256 Hash)

Same input → identical output every single time.

Run 1: 9f6a1c60aa8a3b72  
Run 2: 9f6a1c60aa8a3b72  
Run 3: 9f6a1c60aa8a3b72  
Run 4: 9f6a1c60aa8a3b72

Security implication: Behavior is **fully predictable**.  
You can unit-test, audit, and prove safe behavior.

PART 2: Probabilistic AI Model (temperature = 0.9)

Same input → **different output each run** due to sampling.

ep01\_deterministic\_vs\_probabilistic.py

# Run It

!python3 + Copy Path → Run

# AI-Powered Demos Need a Key

Most demos are simulations — they run anywhere

A few connect live to OpenAI APIs

One-time setup: free OpenAI account + API key

### Invite your team

Members can make standard API requests  
and read basic organizational data.

The screenshot shows the Google AI Studio dashboard for a project named 'SecAlplus'. The left sidebar contains navigation links: Home, Create, Chat, Agent Builder, Audio, Images, Videos, Assistants, Manage, Usage, API keys, ChatGPT Apps, Logs, Storage, Batches, and Optimize. The main content area features a banner for GPT-5.4 and GPT-5.4-mini, a 'Home' section with usage statistics, and a 'Recommended models' section. A video call overlay with a man's face is in the top right corner.
